Subject: Instructions concerning setup

To whom it may concern

> place. order.hanging etc.

“minuteman” should be put on the wall in the height of the average mans eyes in the order of 1 , 2 , 3 {on the back of tableaux there are numbers 1,2,3 soldates} then text and title as you put it for the other works.

_all tableaux and additional text must be installed on one wall._Distance between each depends from the place y put it on , but it should be approx. 12 to 15 cm or size proportional to whole setup.

_about hanging: sticking to the wall or battened with the nail if it is ok {rusty nail if you find it, few cm above the photograph}

_idea was to put glass above the tableaux but due to transportation it was not possible.

> lighting

if it is possible give an accent with light to photographs rather than the complete tableaux cause black surface is not so good and neat__

[I don't know lighting constellation in viafarini, also I am not familiar with this space so thats reason these instructions are not so proper, maybe]

—
—
> text and title of the work

if it is possible print text on tracing {cristallo} paper, A4 format,
with the given font in which texts are already

hope all these instruction will be of some help. thanks in advance.
with best regards
