

SHANE CAMPBELL PROPOSAL for VIR Viafarini-in-residence

This year I had the opportunity to travel to Italy and visited Milan for a day. Being from southern California, I was inspired by the dynamic setting of Milan, for example, seeing the castle in the center of town and the modern businesses just around the corner. During a three months residency, I would take advantage of the history in Milan and its surrounding cities, furthering my studies by pursuing the contemporary and historic cultural opportunities. My purpose would be to develop a series of narrative works that would be specific to my time spent there.
